Challenges

Carnegie Technologies delivers end-to-end IoT solutions, pre-configured for various industries and designed to work right out of the box. Carnegie Technologies' Longview IoT was purposefully developed as a full set of IoT technologies to provide their customers with a single, secure, and optimized IoT solution to monitor and manage industrial assets.

As a startup employing LoRaWAN network architecture on AWS services, Longview was

Longview uses GlobalSign's IoT Edge Enroll integration on its IoT Identity Platform to manage their Private CA and encrypt data communication
